**Urban Institute and Child Trends, Inc. 2000:** Based on a special analysis of 1997 NSAF data prepared for the Center for the Study of Children’s Futures by Child Trends, Inc. The NSAF is part of the Urban Institute’s multi-year Assessing the New Federalism project. The sample surveyed described the working of America’s families. Additional information is available at the Internet at [http://www.urban.org/cps](http://www.urban.org/cps).

**Unpublished CPS data:** Based on analysis of March Current Population Survey data by Sue Elley, doctoral student, College of Public Health, University of South Florida. Five years of data (1996-1998) were used for this analysis.

**U.S. Bureau of the Census:** Based on Historical Time Series Tables from the U.S. Bureau of the Census. These tables are available on the Internet at [http://www.census.gov/popest/www/ms-la.html#history](http://www.census.gov/popest/www/ms-la.html#history).

**Report to Congress on Out-of-Wedlock Childbearing (1995):** This report was compiled by the National Center for Health Statistics and is available on the Internet at [http://www.cdc.gov/nchs/wedlock.pdf](http://www.cdc.gov/nchs/wedlock.pdf).

**Academic Motivation**

- "Cares to do well in school" refers to the most knowledgeable adult’s response when asked if the child cares about doing well in school.

- "Whether the child had participated in sports, lessons, and/or clubs." refers to the most knowledgeable adult’s response to "Has the child participated in sports, lessons, and/or clubs?"

**Number of Extracurricular Activities:** "Number of extracurricular activities" refers to the total number of extracurricular activities in which the child participated either through school or on his or her own. The term "children," as used in the table on living arrangements of children under 18, are all persons under 18 years of age living in the household who are related to the chief engineer in charge of this construction is the family.

**Science has established two facts meaningful for human welfare:** first, the foundation of the structural human personality is laid down in early childhood; and second, the chief engineer in charge of this construction is the family. - Mayer Franz Nemeth

**Living Arrangements**

**A CLOSER LOOK AT FAMILIES**

**In 1998, 5.6% of all United States children lived in a home maintained by a grandfather, compared to 3.2% in 1970.**

**Grandparent-Maintained Households: A grandparent-maintained household refers to a housing unit that is owned or rented by one of the grandparents of a child under age 18. This child’s parents may or may not be present in the household.**

**Health Insurance Coverage:** A person was considered covered by health insurance if he/she responded "yes" to being currently covered by one of the insurance plans (public or private) and responded "no" to question asking if they were currently uninsured. Federal Poverty Level (FPL). Poverty status refers to family income as a percentage of the 1996 federal poverty level. For a family consisting of two adults with two children, the 1996 FPL was $5,123.

**Number of Extracurricular Activities:** "Number of extracurricular activities" refers to the total number of extracurricular activities in which the child participated either through school or on his or her own.

### Definitions

- **Living Arrangement**: The term living arrangement is used when additional information is provided about a child’s relationship to other individuals living in the household.

- **Sample sizes reported are unweighted values.**

- **Percentages reported are weighted values.**

- **Current Population Survey (CPS)**: Children. The term “children” as used in the table on living arrangements of children under 18, are all persons under 18 years, excluding those who maintain households, families, or subfamilies as a reference person or spouse.

- **Grandparent-Maintained Household**: A grandparent-maintained household refers to a housing unit that is owned or rented by one of the grandparents of a child under age 18. This child’s parents may or may not be present in the household.

- **Health Insurance Coverage**: A person was considered covered by health insurance at some time during the year if he or she was covered by at least one of the following types of coverage: (1) employer-sponsored, (2) privately purchased, (3) Medicaid, (4) military health care, (5) someone outside the household, (6) other.

- **Housing**: A housing unit consists of all the people who occupy a housing unit and the related family members and all the unrelated people who share the housing unit.

- **Parent-Maintained Household**: A parent-maintained household refers to a housing unit that is owned or rented by one or both parents of a child under age 18. This child’s grandparents may or may not be present in the household.

- **Unmarried Couple**: An unmarried couple is composed of two adult siblings of opposite sex (any of whom is a parent) in whose name the housing unit is owned or rented who share a housing unit with or without the presence of children under 15 years old. Unmarried couple households contain only two adults.

- **National Survey of America’s Families (NSAF)**: Health Insurance Coverage. A person was considered covered by health insurance if the reported “yes” is being currently covered by any one of the insurance plans (public or private) or responded “no” to the question asking if they were currently uninsured.

- **Federal Poverty Level (FPL)**: Poverty status refers to family income as a percentage of the 1996 federal poverty level. For a family, consisting of two adults with two children, the 1996 FPL was $15,115.

- **Number of Extracurricular Activities**: “Number of extracurricular activities” refers to the most knowledgeable adult’s response to the question “How many extracurricular activities does your child participate in at school?”

- **Cares to Do Well in School**: “Cares to do well in school” refers to the most knowledgeable adult’s response when asked if the child cares about doing well in school.

**AMERICA'S FAMILIES ARE CHANGING**

**Percent of Children Under Age 18 by Living Arrangement, United States, Selected Years**

- **In 1998, 5.6% of all United States children lived in a home maintained by a grandparent.** This child’s parents may or may not be present in the household.

- **Grandparent-Maintained Household.** A grandparent-maintained household refers to a housing unit that is owned or rented by one or both grandparents of a child under age 18. This child’s parents may or may not be present in the household.

- **Health Insurance Coverage.** A person was considered covered by health insurance if he or she was covered by at least one of the following types of coverage: (1) employer or union provided, (2) privately purchased, (3) Medicare, (4) military health care, (5) someone outside the household, (6) other.

- **Children.** The term “children,” as used in the table on living arrangements of children under 18, are all persons under 18 years, excluding people who maintain households, families, or establishments as a reference person or persons.

**DEFINITIONS**

- **Parent-Maintained Household.** A parent-maintained household refers to a housing unit that is owned or rented by one or both parents of a child under age 18. This child’s grandparents may or may not be present in the household.

- **Unmarried Couple.** An unmarried couple is composed of two unrelated adults of the opposite sex (one of whom is the person in whose name the housing unit is owned or rented) who share a housing unit with or without the presence of children under 15 years old. Unmarried couple households contain only two adults.

1997 National Survey of America’s Families (NSAF)

The NSAF is part of the Urban Institute’s multi-year Assessing the New Federalism project. The 1997 survey helped describe the well-being of America’s families by examining employment, earnings and income, educational attainment, family structure, health status, psychological well-being, participation in religious and volunteer activities, knowledge about availability of services, and participation in government programs. Data from the survey provide estimates for selected states as well as for the nation as a whole. Detailed information was obtained on 75,437 adults and 34,439 children in 44,461 households across the United States. For the Florida state-level report, data on 2,063 children were analyzed. Additional information about the NSAF is available at http://newfederalism.urban.org/nsaf.

Current Population Survey (CPS), March Supplement

The CPS, conducted for over 50 years by the US Bureau of the Census for the US Bureau of Labor Statistics, is a monthly survey of about 50,000 households. The March supplement, also know as the Annual Demographic Survey, is the primary source of detailed information on income and work experience in the United States. This survey is used to generate the annual Population Profile of the United States, reports on geographical mobility and educational attainment, and detailed analysis of money income and poverty status. In addition to the numerous reports issued by the Bureaus of Labor Statistics and Census based on data from this survey, a public-use data file is available for private researchers to use for academic and policy-related analyses. Additional information about the CPS is available at http://www.bls.census.gov/cps.

National Center for Health Statistics (NCHS)

The NCHS is the Federal Government’s principal vital and health statistics agency, providing a wide variety of data that can be used to monitor the Nation’s health. The NCHS is part of the Centers for Disease Control and Prevention, U.S. Department of Health and Human Services. Additional Information about NCHS is available at http://www.cdc.gov/nchs.
