Florida Household Income

Household income includes income of the householder and all other people 15 years and older in the household, whether or not they are related to the householder.

Median income is the point that divides the household income distribution into halves, one-half with income above the median and the other with income below the median. The median is based on the income distribution of all households, including those with no income.

Non-family household consists of a householder living alone or with nonrelatives only.

Family household consists of a householder and one or more other people living in the same household who are related to the householder by birth, marriage, or adoption.
